

Cyber Security and Privacy Research Institute (CSPRI)  
presents

# IoT Security and TRUSTICA Framework

Speaker:

**Dr. Fatih Comlekoglu**

SEAS alumnus and CTO, [Blue Planet-works](#)

Thursday April 18, 2019 at 12:00 noon

(An informal lunch will be served)

Location SEH-2990

*Please RSVP to CSPRI Director [toregas1@gwu.edu](mailto:toregas1@gwu.edu)*

The intent of this and future [Cyber Security and Privacy Research Institute](#) (CSPRI) lunches is to provide glimpses of the vibrant security and privacy private sector in the Washington region to GW faculty and students and to promote dialog and debate regarding breakthrough initiatives. The potential of support for research or conference papers on related topics will be part of the discussion.

## **What is TRUSTICA?**

A Security Operating system for all connected systems. An Integrated Platform for Trust ID management, Secure Communication, Data Protection, anonymous authentication to protect privacy. An attestation technology for device validity, and user authentication technology.
